

Exhibitor Index

Company	Booth #	Company Profile
AAPG	9, 10	Currently the world's largest professional geological society with over 30,000 members, AAPG provides publications, conferences, and educational opportunities to geoscientists and disseminates the most current geological information available.
AGIA-GeoCare Benefits Insurance Programs	8	AAPG members are invited to take advantage of the quality insurance coverage offered through GeoCare Benefits Program. Choose from a variety of supplemental plans - Annuities, Cancer, Disability, HSA & Medicare to name a few.
dGB Earth Sciences	24	OpendTect is the world's first open source complete seismic interpretation package (www.opendtect.org). Advanced workflows such as the HorizonCube, Dip Steering, Sequence Stratigraphy, and Neural Networks are available as closed source plugins.
Energy Compliance LLC	30	Distributor: Sioux Steel secondary containment systems & accessories; synthetic liners; plastic tubs & pipe stands. Professional Services: Hydrogeology; Site Assessment; Environmental Compliance & Permitting; Surface Water Hydrology, Water Rights.
Expro Americas, LLC	41	Expro's business is well flow management, providing a complete package of solutions across the lifecycle of a well. Expro's downhole video camera systems offer operators a cost effective way to 'see' downhole problems across range of oil and gas wells.
Field Geo Services	40	Field Geo Services is a your solution to Wellsite Mudlogging within the Rocky Mtn. Region. Based out of Grand Junction CO, FGS covers Geothermal, Geo-Steering, Wellsite, and Remote Logging solutions.
Fluid Inclusion Technologies	18	FIT specializes in 1) laboratory analysis of geological samples for trapped organic and inorganic paleo-fluids, and 2) geochemical profiling of borehole fluids at well site with direct quadrupole mass spectrometry.
Fronterra Geosciences	37	Fronterra Geosciences is an independent supplier of class leading geoscience solutions, from single well analysis through full field development plans.
GeoKinetics Inc	39	A leading worldwide geophysical service company, offering a wide range of capabilities, including Land/OBC/TZ seismic acquisition, advanced processing and interpretation. Geokinetics continues to add to its extensive 2D/3D multi-client data library.
Geopinion, Inc.	33	Geopinion is a geologic & natural resource based company, providing expert opinions, by educated, trained, certified and experienced geologist. Geopinion has been involved through consulting, participation & ownership in natural resource projects.
Geosearch Logging, Inc.	6	Geosearch Logging, Inc was founded in 1983 providing comprehensive hydrocarbon well logging, geological and geosteering services throughout the United States; logging over 700 wells annually.
GETECH	5	GETECH is the foremost provider of US gravity and magnetic data. We offer custom integrated interpretation services and non-exclusive knowledge-based studies. Visit www.getech.com .
Goolsby, Finley and Associates, LLC	34	Goolsby, Finley and Associates specializes in conventional and unconventional oil and gas exploration including property evaluation, prospect generation, estate appraisals, commission hearings and geologic wellsite supervision.
Horizon Well Logging, LLC	29	Horizon Well Logging is the premier mud logging and geosteering firm supporting natural gas and oil exploration companies from the Mid-continent, S. Texas, Rockies, Appalachia region and beyond since 1988 utilizing cutting edge technology.
IHS	3	IHS research, specialized information, valuations, forecasts and modeling solutions help planners and technical professionals in the oil & gas, coal, power and clean energy communities analyze risks and optimize asset performance.

Jonah Bank of Wyoming, Nerd Gas, & Ugly Bug Fly Shop	16	Jonah Bank holds unique expertise in financing O&G projects. We exist because of this industry. Stop by booth #16 to discuss your project with us!
LSSI, Ltd.	38	LSSI has specialized for the past 35 years in regional carbonate play evaluations and the structural interpretation of gravity and magnetic data in defining prospective reservoir trends and sweet spots in resource plays.
Micro Seismic	4	MicroSeismic is the technology and market leader for hydraulic fracture monitoring. MSI provides real-time information on fracture location and geometry helping operators increase their production and recovery, while decreasing cost and risk.
Neuralog	26	Neuralog provides data conversion software (NeuraLog, NeuraMap, Neura-View), geological interpretation software (NeuraSection), high speed log printers and scanners, plus well data management (NeuraDB) to the upstream oil & gas industry.
NuTech Energy Alliance	27	NuTech utilizes a suite of services, namely NuLook, NuStim, and NuView in an integrated, multidisciplinary approach that provides a complete picture of the reservoir.
Old Dead Things LLC	7	Old Dead Things LLC is a fossil company based in Casper, Wyoming. We collect, prep and sell fossils. The majority of our business involves Green River fossil fish and Cretaceous ammonites. We also sell minerals, jewelry, and rockhound supplies.
Pearson Technologies	38	Pearson Technologies applies geology, gravity and magnetics to detect basement structuring and faulting for oil exploration in both convention and fractured shale sweetspot plays.
Pioneer Wireline Services	35	Pioneer Wireline Services offers open & cased hole service in all major oil & gas producing regions in the U.S. Our experienced local personnel, one of the newest logging fleets, and strong safety record are the basis for quality & reliable service.
PML Exploration Services, LLC	43	PML Exploration Services is an innovative, customer driven Mud Logging provider to the oil and gas industry. We operate in Oklahoma, Texas, Louisiana, Montana, North Dakota, Pennsylvania, and West Virginia. (Booth is located outside of the East Porte Cochere.)
PTTC Rocky Mountain Region	25	Not for profit organization located at Colorado School of Mines putting on high quality, low cost Continuing Education and Technical workshops and short courses.
R360 Environmental Solutions	22	Incorporating the nation's oilfield waste management leaders, R360 Environmental Solutions has the innovative processes and industry knowledge to bring All Around Reliability to your E&P waste disposal and recycling.
Research Partnership to Secure Energy for America	19	RPSEA is a consortium of 170 U.S. entities, providing a stewardship role in ensuring the focused research, development and deployment of safe and environmentally responsible technology that can effectively deliver hydrocarbons from domestic resources
Reservoir Group	36	Reservoir Group Coring Services Market leader in new coring technology with the most experienced engineers in the industry. Technology includes; Liquid Trapper, Thin Sleeve System, Pressure Core Sampler and the QuickCore wireline retrieval system
Rock Wash, USA	17	RockWash, USA, specializes in cuttings and core cleaning and photography services. An entire wellbore can be washed and photographed in a day, and photos can be electronically transferred, viewed and manipulated with photo-STRAT software.
Rocky Mountain Association of Geologists	13	RMAG is a non-profit association for Geoscientists. The association hosts educational symposiums, short courses and field trips We also publish books for professional geologists. Visit us at www.RMAG.org
TGS Geological Products	31	TGS is a trusted geoscience data resource for oil and gas companies worldwide. TGS' global well data library includes 6.5 million well logs available online, in addition to production data, directional surveys and well file data solutions.

The White Star Corporation	15	Headquartered in Lakewood, Colorado, WhiteStar Corp. supplies digital cartographic data products, services and consulting to the energy industry. Learn more at www.whitestar.com or call 800.736.MAPS.
Thermo Scientific Niton XRF Analyzers	14	In-situ mud logging for elemental geochemistry. Core/cuttings analysis. Choose handheld Thermo Scientific Niton XRF GOLDD [®] analyzers. NEW Niton FXL field x-ray lab for advanced exploration/drilling, industrial mineral mining, oil & gas exploration.
University of Wyoming School of Energy Resources	28	The mission of the UW School of Energy Resources is to promote the development of the human resources and know-how required to solve critical energy challenges faced by society. We strengthen the significant talent and resources at the University of Wyoming.
University of Wyoming Department of Geology & Geophysics	28	With 24 faculty members, our undergraduate and graduate course offerings and research interests span a broad array of earth and planetary sciences. Our Department is also active in applied science. In tandem with the School of Energy Resources, we provide training and research in hydrocarbon exploration, carbon sequestration, water resources, and watershed management. We also have a very strong program in computational geophysics.
US-BLM Wyoming	20	The Bureau of Land Management's (BLM) Wyoming organization manages vast stretches of public, multiple resource, lands that make significant contributions to Wyoming & the Nation's diverse energy portfolio.
Utah Geological Survey	21	An applied scientific state agency that creates, interprets, and provides information about Utah's geologic environment, resources, and hazards to promote safe, beneficial, and wise use of the land.
Vista Geoscience	23	Geochemical tools: reduce your risk in O&G exploration and protect energy assets. Geochemical exploration surveys for land acquisition, seismic and drilling. Baseline environmental surveys: prevent/manage potential litigation.
Weatherford International	1, 2	Weatherford International Ltd (WFT:NYSE) is one of the largest diversified upstream oilfield service companies in the world. Our products and services span the lifecycle of a well, including drilling, evaluation, completion, production and intervention. The Company's range of production-enabling technologies include evaluation services, directional drilling services, Secure DrillingSM services, cased hole completion systems, expandable technologies, intelligent completion technologies, production optimization systems and all major forms of artificial lift.
Wyoming Board of Professional Geologists	12	The Board's mission is to protect the health, safety, and welfare of the public by promoting the practice of geology by professional geologists and by providing fair and balanced regulation of the geologic profession.
Wyoming Geological Association	11	Since 1943 WGA has been supporting advancement in the growth of the energy and geologic resources of the state and publishes guidebooks & symposiums pertaining to these. The sales of these books help support the many scholarships we offer.
Wyoming State Geological Survey	32	The Wyoming State Geological Survey's mission is to promote the beneficial and environmentally sound use of Wyoming's vast geologic, mineral, and energy resources while helping protect the public from geologic hazards. By providing accurate information and expanding knowledge through the application of geologic principles, the Geological Survey contributes to economic growth and improvement in the quality of life for Wyoming's residents.
Zapata Incorporated	42	ZAPATA specializes in high resolution reflection seismic surveys for petroleum, geothermal and mineral exploration projects in the Basin and Range and Rocky Mountain Physiographic Provinces.
